VITAP ANNOUNCES NEW VERSION OF THE POINT K2

Vitap S.p.A. and Atlantic Machinery Corp. has just released information on the new version of the Point K2, a successful compact CNC machine that is designed for custom manufacturers and also for flexible, high-production environments.

The K2 is a revolutionary CNC working center that allows for cutting, drilling, grooving, and routing operations. All of these processes can be achieved without the need to reset the parts hold-down systems, resulting in zero set up time. This is due to the unique, patented D-D-T (Double-Dynamic-Transport) system. The DDT ensures a continuous, uninterrupted operation – indispensable for all milling operations.

Additional features include:

- Fully programmable 4 controlled axis
- Optimizing software
- 9 independent vertical spindles
- 2+2 horizontal spindles on X axis
- 1+1 horizontal spindles on Y axis
- 10,000-24,000 RPM router
- 1 grooving saw
- Through feed system

To learn more about the Point K2 or other products, call Atlantic Machinery Corp., Vitap's exclusive importer and distributor in North America, at 860-354-7200 x109 or go to www.atlanticmach.com.
