VITAP ANNOUNCES A NEW SEMI-AUTOMATIC ENTRY-LEVEL CONTOUR EDGE BANDER

Vitap S.p.A. and Atlantic Machinery Corporation have just released information and a video on their new semi-automatic entry-level contour edgebander called the **Stellar**. If you are looking for an inexpensive solution to edgeband your large or small contoured parts, whether concave or convex, look no further than the **Stellar**.

What sets the **Stellar** apart from other entry-level edgebanders is its movable support arm. This adjustable swivel arm is equipped with a vacuum pod that holds the panel in place, which allows for large panels to be edgebanded. No longer does an operator need to struggle with large panel pieces to hold them in place – the articulated arm performs this part of the operation.

The **Stellar** will be introduced at the AWFS Fair in Las Vegas, NV, held July 19-22, 2017. Come to our booth **#10227** to see this innovative entry-level edgebander demonstrated. Special show pricing will be offered.

To learn more about the **Stellar** or other products, call Atlantic Machinery Corp., Vitap's exclusive importer and distributor in North America, at 860-354-7200 x109 or go to www.atlanticmach.com.
