

Dust Collectors – High Efficiency Models

Model **FM3/NB - Indoor**
 Model **FM3/NB/PT - Outdoor** (includes panels & roof)

Model **FM4/NB - Indoor**
 Model **FM4/NB/PT - Outdoor** (includes panels & roof)

Model **FM5/NB - Indoor**
 Model **FM5/NB/PT - Outdoor** (includes panels & roof)

For your growing dust collection needs, look no further than the “FM” series of modular systems! Designed for indoor or outdoor use with hot air re-circulation vents, the FM units are available with motors ranging from 7.5 to 30 HP, motorized shaker units, and noise dampening enclosures. Featuring multiple filter bags made of special woven felt (16 per module), CORAL FM units provide high efficiency at an affordable price.

Specifications

- FM/NB units are suitable for indoor and outdoor use. Designed with a bottom entry, complete with motorized shaker unit, these models are recommended for chips, sawdust mix and sanding dust applications.

Options

- Return air diffusers
- Explosion proof panels
- UL Electrical Control Box
