## PRESSES

- We carry a complete line of membrane, membrane/air, cold, hot, continuous cycle and throughfeed systems; door/frame clamps and case clamps.
- Since there are many different models available, not counting different sizes, it would be impractical to include all of them.
- We have videos and individual brochures available and will be glad to quote you machines according to your needs.

---

Our **cold** presses are very heavy-duty, hydraulic presses (not pneumatic).

Our **hot** presses come with a choice of three different platens with hot oil circulation and ELKOM electric platens.

*Sizes available are:*

- 4' x 8', 4' x 10'
- 5' x 10', 5' x 12'

**Hot** presses are available with single or multiple platens.

*Also available from EUROPRESS are:*

- Hot presses with automatic loading, throughfeed pressing and off loading with mylar belts
- Continuous cycle presses for medium/high and high production
- Complete line operations with LCC presses and all gluing, infeed and outfeed components
