

Pneumatically-Operated Miter Saw

V 235

Double Miter Saw with fixed 90 degrees 14" saw blades

Last generation vertical Double Miter Saw from OMGA, the V 235 is the result of 30 years of experience in this field. This compact and powerful system counts with all features and patented devices that OMGA designed throughout the years, such as the ProfilBlock clamping system or the popular patented Scaled Tables to name a few. The vertical travel system along with its powerful 4 HP motor make of the V 235 the perfect choice for accuracy and toughness in a variety of application for the picture frame, cabinet and millwork industries. Because of its versatility the V 235 is well suited to be connected with our OMGA Stop TM creating a truly integrated system which can be configured in a variety of levels of automation to fulfill the most demanding mitering tasks. Optional equipment such as Scaled Table Extensions, Dust collecting Systems, additional Moveable Stops, Aluminum version Kit and others, can be added to further complete the standard machine.

TECHNICAL DATA

• Max cutting width	3 9/16"
• Max cutting height	3"
• Motor power HP	2 X 2 HP
• Saw blade bore	30 mm
• Saw blades Diameter	350 mm
• Arbor Speed RPM	3200
• Auto miter position	N/A
• Miter positioning stops	45
• Overall dimensions	59" x 30" x 63"
• Crated dimensions	62" x 35" x 67"
• Dust chute	2 X 3"

OPTIONAL EQUIPMENT

• 40" Table Extension with Scale RH	Extends the standard scale table on the machine by 40" on the right end side
• Manual Flip-Over Stop	Slides in the fence of the machine and can be flipped back manually
• Pneumatic Flip-Over Stop	Slides in the fence of the machine and can be flipped back pneumatically with a remote lever control
