

BC91 evo

CONTOUR EDGE BANDER – for straight & curved pieces (convex & concave)

STANDARD FEATURES

- To glue pieces thickness 10-60 mms., in PVC, melamine, veneer, plastic laminate & solid wood;
- 2 glue spreading rollers;
- Cutting guillotine up to 3 mm. thickness;
- Band length measuring by means of a digital electronic counter;
- Tape cut by foot pedal to edge just one piece;
- Encoder for high precision cutting of the tape (for shaped closed pieces);
- End switch for cutting of the tape for straight closed pieces;
- 2 tape feeding speed (3 - 7 mts./min);
- Solid Phenolic table easy to clean and with no transmission of heat;
- Manual / Automatic band cutting device
- Glue container (1 kg), with electronic adjustable heating system;
- Tilting table 0° - 45°
- Standard accessories

CE STANDARDS

OPTIONS

- Enlarged tape plate 800 mms
- Semi-automatic end-cutter with motor 0,6HP (kw 0,33), blade diameter 100 mm. and working table bar 300x300 mms
- Support bar with rollers
- One wheel-motorized feeder for shaped pieces with same speed of the edge-banding roller. Pneumatic lifting device of the wheel
- Maximum tape high height of tape 120 mms (only 1 roller)
- Hot air blower
- Side pushing bar

TECHNICAL SPECS

- Panel Height 10 – 60 mm
- Band Thickness 0.3 – 3 mm
- Minimum Radius with Concave Curve 20 mm
- Minimum Panel Length 280 mm
- Feed Speed 3.5 – 20 mm
- Power 4.5 kw
- Operating Pressure 7-8 bar
- Overall Size 1000 x 1100 x 1200 (mm)
- Net Weight 881 lbs
