## **ATLANTIC MACHINERY NOW EXCLUSIVE NORTH AMERICA IMPORTER & DISTRIBUTOR OF GMC'S VERTICAL PANEL SAWS**

Atlantic Machinery, located in New Milford, CT is pleased to announce it has been name exclusive importer and distributor in North America of G.M.C. SRL of Carpi, Italy. GMC, a second-generation manufacturer in business for over 50 years, designs, manufacturers, and markets a complete line of vertical panel saws for various manufacturing sectors. They produce one-piece, welded-frame machines (monoblock) for wood, solid surface and composite material applications, all in a variety of manual models, automatic models, and electronic-programmable models. Cutting capacity ranges from 4'x8' to 7'x17', with automatic moving grid standard on all models.

GMC's line of vertical panel saws are well-known worldwide for their high quality, precision, and reliability while also being customizable for the client's production needs. Some of the noticeable options are:

- a true split scoring blade 110mm in diameter
- 3 types of moveable grids are available
- the possibility to utilize a V Grooving cutter
- dual metric and English measurement scales
- electronic digital measurement systems for both horizontal and vertical cutting
- an electrically controlled MFP grid designed for working with very thin material and/or very small panels that could fall between the conventional horizontal back grid supports. This device also cuts dust emissions by up to 30%.

To learn more about GMC's products, prices, and spare parts, call Atlantic Machinery at 860-354-7200 or go to [www.atlanticmach.com](http://www.atlanticmach.com).
