## CORAL ANNOUNCES THE MINIVELLO FOR THE U.S. MARKET

CORAL S.p.A. of Italy and Atlantic Machinery Corporation in New Milford, CT announce a new wet spray booth for the U.S. market. Called the **Minivelo**, this spray booth has been available in Europe and Asia for a number of years and now is being offered in the U.S. As the perfect spray booth for small production environments and hobbyists, it will be featured in Atlantic Machinery's booth #6713 at the upcoming IWF show in Atlanta.

The **Minivelo** wet spray booth is used in the coating of pieces of small dimensions, utilizing a revolving work piece holder. The unit is made of zinc-plated bolted panels and are equipped with 2 air washing cleaning stages and a dry filtration system. The first filtration stage occurs on the front water veil; the second is completed by forcing the air passing through the water mist generated by the mist distribution pipe; both are powered by the pump located in the **Minivelo** tank. The residual pigments are blocked by a coconut fiber filter located near the intake opening of the extraction fan which is housed in the sloped part of the roof.

Coral wet spray booths are also available in large-industry sizes. With many hundreds of portable and stationary dust collectors, plus spray booths, cartridge filters, and down draft tables in the field, Coral has become a household name in the woodworking industry. Their innovations (first to introduce high efficiency cartridge filter systems and wet spray booths) have made them an undisputed leader in the industry

Stop by Atlantic Machinery's IWF booth #6713 to view demonstrations and talk with a Coral representative about the **Minivelo** and other Coral offerings. To learn more about Coral's products, prices, and spare parts, call Atlantic Machinery at 860-354-7200 or go to [www.atlanticmach.com](http://www.atlanticmach.com).
