ATLANTIC MACHINERY INTRODUCES FRAVOL RAPID SERIES OF EDGE BANDERS

Fraval s.r.l., located in Peraga Di Vigonza, Italy, just outside Venice, is one of the most successful manufacturers of edge bander machines in the world. Since 1963, when they introduced their first glue-based edge bander, they have expanded their offering to include many more models.

Currently holding 13 world-patented designs, Fraval offers a complete line of high-quality, innovative edgebanding machines. In addition to their automatic, single-side edge processing machines for both straight and curved applications, they offer a wide selection of options designed for small to large shops. Fraval edge banders are heavy-duty machines engineered to perform in the most hostile environments. They can process thin tape, 3mm PVC, HPL, aluminum and solid wood strips up to 16mm thick. Fraval also offers semiautomatic edgebanders and trimming machines for edging round or curved parts. Custom machines can be ordered to meet exact requirements for manufacturing.

Fraval RAPID RX750

The Fraval RAPID Series edgebanders are top-of-the-line automatic straight edgebanders. These machines are perfect for industrial applications, with many available custom options. The models range from compact to custom lengths, featuring touch screens with PLC electronic controls for rapid set-ups, and patented corner rounding unit for both end trimming and corner rounding.

Standard features include a pre-mill unit, edge scraping unit, glue scraping unit, two motor end-trim, Eco mode system, and a sound-proof booth with LED interior lighting. Available options include an auto-reverse glue tank, heated glue roller, IR lamp, cleaning agent spraying system, NC-controlled infeed guide, Industry 4.0 package, polishing brush unit, heated infeed fence, and much, much more.
