VOLPATO RENEWS ATLANTIC MACHINERY AS EXCLUSIVE U.S. DISTRIBUTOR & IMPORTER

Volpato srl of Italy and Atlantic Machinery Corporation in New Milford, CT announce a renewed distribution agreement for the sale of Volpato's innovative line of oscillating edge sanders, throughfeed sanders, and shape & sand machines in the U.S. This agreement follows a cooperation in the marketing and sales in this country, going back to the mid 1980's, with thousands of units sold and still in service today. Some of the Volpato machines featured in Atlantic Machinery's IWF Atlanta booth #6713 are:

LBK 150 EDGE SANDER

Heavy duty double-sided oscillating edge sander with special veneering package and spindle sanding attachment.

RCG 1200 EDGE SANDER

Double sided calibrating sanding machine with mechanical oscillation of the belts. Great for sanding drawers.

LS SERIES OF PROFILE & EDGE SANDINGS (shape & sand throughfeed)

For a big production, up to 3000 linear meters sanded per hour, Volpato is able to provide lines that can shape, sand, polish, silk, brush, and polish any type of profile in one passage, ensuring the highest level of finishing and maintaining a high level of efficiency. This new series of sanders can be outfitted with various groups of sanding belts and abrasive wheels according to the customer's needs, as well as multiple tiltable shaper spindle groups which are ideal for raised panel door production. These compact machines are extremely versatile and they are ideal for the small shop as well as high production facilities. All belt sanding groups have a timed entry, adjustable mechanical oscillation, pneumatic belt tension and air blower.

Stop by Atlantic Machinery's IWF booth #6713 to view demonstrations and talk with a Volpato representative about these and other Volpato offerings. To learn more about Volpato's products, prices, and spare parts, call Atlantic Machinery Corporation at 860-354-7200 or go to www.atlanticmach.com.
